

Aristotle, Microsoft and 4-H are working together to bring digital skills classes to Arkansans.

[Sign-up today](#) for the free trainings to learn from 4-H teen leaders how to increase your computer literacy. Each training will focus on one of two important topics: online communication skills and increasing your employment opportunities. These virtual classes will offer 60 minutes of hands-on training and the opportunity to ask the 4-H teen leaders your most pressing technology questions.

Trainings start April 12th, so find out more and [REGISTER TODAY](#) for the upcoming classes!

Computer Skills for Everyday Life

Learn how to 'talk' with friends, family, and co-workers via the internet. Join us on this webinar to learn how to connect with others via video conferencing and creating and sending emails to communicate effectively and safely.
